Site involves an extremely tall, extremely solid tapered structure, whose "outside" is of greater significance than its 'inside'. The top is flat and has some sort of cruciform pattern on it & there's a lip or ledge around the top. Entire structure seems to be built on a foundation higher than surrounding terrain, and may have smaller rectangular bldgs around it or even attached. ~~These~~ Structures seem to have a purpose of "watching". It was the sense of isolation or separation, as if it's located in a ^{remote} non-urban area. Structure seems to have corners (as opposed to rounded) and to have embrasures or openings into the side of it every so often. It's been here a long time.
